

A workshop on digital archive held

05.06.2015 12:26

A workshop on digital archive was held on 26-28 May 2015 in Gradačac under the CILAP Project.

This workshop was attended by representatives of the Republic Administration for Geodetic and Real Property Affairs of RS, the Federal Administration for Geodetic and Real Property Affairs of FBH, the municipal cadastre and LR office in Gradačac, and Swedish experts on behalf of the CILAP Project.

The theme of the workshop was a pilot project to establish a digital archive and integrate it in the business processes in the territory of the Municipality of Gradačac. The existing situation in the municipal cadastre and LR office with regard to the documentation that will be subject to the pilot project was discussed

during the workshop. The plan is to include both the cadastre and land registry documentation in the digital archive. Also, the needs and organization of premises, human capacities, and hardware equipment were analyzed. As part of the workshop, visits to the cadastral and LR offices in Gradačac were organized and activities and preparatory actions to be completed prior to finalizing a paper on digital archive IT system architecture as the basis for selection of the best IT solution for digital archive were agreed.

The next workshop is planned for September 2015.
