The Government of the Federation of Bosnia and Herzegovina at its 195th regular session held in Sarajevo on 17 October 2019 adopted the new Rulebook on the Internal Organization of the Federal Administration for Geodetic and Real Property Affairs after the Administration's proposal and after obtaining the opinions and approval of other competent administrative bodies.

The new Rulebook on Internal Organization of the Federal Administration for Geodetic and Real Property Affairs has been created and adopted to ensure an adequate organizational structure for realization of crucial activities in the land administration sector and economy, for which activities are financed by donor, credit, budget and other funds.

By adopting the new Rulebook on Internal Organization, in addition to previously existing organizational units, new organizational units are introduced and organized with responsibility of implementation of the Public Investment Program Federation of BiH, the Spatial Data Infrastructure of the Federation of BiH, and institutional and international cooperation from Administration's jurisdiction.
