

GEOSPATIAL WORLD FORUM 2022

09.05.2022 14:02

Within the Geospatial World Forum 2022 was held the pre-conference training program „GKI and

Evolution of the Stakeholder Ecosystem“ on 7-9 May 2022. The main conference will be held on 10-12 May 2022 and includes several thematic units: national mapping, land administration, digital cities, location analytics and business intelligence and integrated EO and new space revolution.

It is known that the geospatial ecosystem is evolving from year to year and includes digital ecosystem modelling and apps for a large number of economic branches. Geospatial data is ubiquitous, and the geospatial ecosystem is leading to the Fourth Industrial Revolution (4IR) and the universal acceptance of geospatial data.

On behalf of the Federal Geodetic Administration at the Conference attends Prof.dr. Slobodanka Kljucanin, and on the second day of the Conference she will present the land administration activities in the Federation of Bosnia and Herzegovina.
