

## MEETING WITH REPRESENTATIVES OF MUNICIPALITY OF ŽEPČE

06.09.2022 15:06

A meeting between representatives of the Federal Geodetic Administration, namely Mr. Željko Obradović, director and Mr. Sead Hadžić, Assistant director with representatives of municipality of Žepče led by mayor Mr. Mato Zovko was held in municipality's premises. Main topic of this meeting was realization of projects in the municipality of Žepče land administration sector.

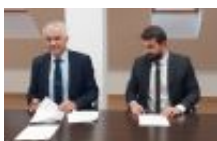

The most active processes in the moment are public exhibition of data regarding survey and cadastral classification of land and resolving the real estate status in populated areas. The legal and technical conditions for the continuation of the public exhibition process were created, and it was agreed to start the

process for two, and later for the remaining cadastral municipalities.

At the meeting it was also discussed on the land registry establishment for six cadastral municipalities within the Real Estate Registration project and that will largely depend on the readiness of the land registry office in Žepče.

The project of the address register establishment for the municipality of Žepče has been completed, and the Municipal Council has adopted the Decision on the names of streets and squares for the urban part, thus the conditions for the address register establishment for the territory of the municipality of Žepče were obtained. It was also installed the Digital Archive software application within the Norwegian donor project and training was carried out.

This meeting served as a continuation of the previous successful cooperation and discussions between the Federal Geodetic Administration and representatives of the municipality of Žepče.
