A meeting of representatives of the Federal Geodetic Administration and municipalities of Bosansko Grahovo, Drvar and Glamoč was held in premises of the Municipality of Drvar on November 21, 2024. The meeting was organized as part of the implementation of land administration projects that Federal Geodetic Administration implement in the territory of the Federation of Bosnia and Herzegovina together

with local self-government units. The main goal of these projects is to improve real estate records and communal infrastructure, which will enable more transparent property management, easier development planning and more efficient provision of services to citizens.

As a part of the meeting, the challenges of each of the local self-government units were analyzed and further guidelines for the preparation of projects were agreed. The most significant project is the real estate cadastre establishment in the area of the Municipality of Bosansko Grahovo and Drvar (public exhibition of data regarding survey and cadastral classification of land), as well as the establishment/replacement of the land register in the area of the Municipality of Glamoč. As the implementation of the Geospatial Infrastructure and Valuation Enhancement (GIVE) project is about to begin, the activities and projects that will be implemented in these municipalities have been agreed upon.
