

## **MEETING WITH REPRESENTATIVES OF THE MUNICIPALITY JAJCE**

05.12.2023 12:57

A meeting between representatives of the Federal Geodetic Administration and Municipality Jajce was held in the Administration's premises on December 4, 2023. The meeting was attended by Director, Mr. Željko Obradović, Assistant Director Mr. Sead Hadžić, and Municipality mayor, Mr. Edin Hozan with his associates.

Topic of the meeting was analysis of current activities of the land administration sector in Municipality Jajce. At the meeting, participants discussed the public exhibition of data regarding survey and cadastral classification of land as a priority project, and in Municipality Jajce the census cadastre is still in force,

which cannot respond all the challenges of today's times. A more systematic approach to the public display process was agreed upon in the coming period, which implies close cooperation between municipal services, the Cantonal Geodetic Administration and the Federal Geodetic Administration.

It is necessary to finish the public display in three cadastral municipalities by the end of year 2024, and in the meantime prepare the priority cadastral municipalities for the public display.
