

## **Second workshop related to Component 5.2. “Study of Land and Property Valuation”**

24.04.2015 09:27

In accordance with CILAP project planned activities in the period from 20-24 April 2015 workshop is held in Banja Luka related to the theme "Development of Price Register technical documentation".

The workshop was conducted by experts from Lantmäteriet Mr. Hans Söderblom, professional in property valuation and Mr. Sannagård Jörgen, an IT professional who has developed and maintains a system of the Price Register in Sweden. On workshop also was present Ms. Marija Rašković expert from Serbia.

The workshop addressed the following topics:

- Main parts of technical documentation for IT system development;
- How to work on technical documentation (roles; use cases; schemes: sources of data, data flow; documents)
- Considerations of the SPR system functionalities and components;
- Specific issues of development of SPR system;
- Practical guidelines (Best practices and golden rules in technical documentation development).

At the beginning of the workshop concepts of the Price Register, presented by the working groups, were discussed in order to introduce to experts differences and similarities between the Implementation Plan of the FBiH and RS.

On the second day experts put forward their suggestions and comments on the Draft of Price Register implementation plans, and general concepts of the Sales Price Register in Serbia and Sweden are presented, its purpose and the functional and non-functional requirements.

The workshop was attended by members of the ICT working group of CILAP project component 6, where they led discussions on solutions of IT / IM specifications for the Price Register. Henceforward, working group of both components will collaborate, and regarding to that during workshop it was necessary to exchange experiences with lecturers and to provide guidance what to take into account during the preparation of technical documentation for the development of IT system.
