

Study visit within CILAP project Component 5: Support to the development of ICT and geoinformation systems

15.06.2017 14:36

In accordance with the CILAP project annual work and time plan a study visit to the headquarters of Lantmäteriet (the Swedish mapping, cadastral and land registration authority) was organized in Gavle, The Kingdom of Sweden. The working visit took place during June 12 - 16, 2017.

During this visit, the participants had the opportunity to obtain detailed information on the most important segment of Lantmateriet's IT sector activities like:

1. IT-business (Servers, Databases, Data storage, identity access management, networks, management

- of mobile devices)
2. IT-development (development models, testing, development tools, Network and system architecture, products, integration)
 3. IT maintenance (maintenance organization, model of maintenance, Service portal, e-services and their monitoring, Intranet)
 4. IT innovation
 5. SWEPOS (network of GNSS permanent stations)

On behalf of Federal Administration for Geodetic and Real Property Affairs Mr. Nedim Hadžiosmanović, Mr. Sead Hadžić and Denis Tabučić, members of CILAP component 5 workgroup have participated to this study visit.
