

The Draft Law on Spatial Data Infrastructure (SDI) of the Federation of BiH was submitted to the Parliamentary procedure

23.08.2019 18:17

The Federation of BiH Government established and submitted to the Parliamentary procedure the Draft Law on Spatial Data Infrastructure (SDI) of the Federation of BiH at the session held in Sarajevo on 22 August 2019.

Spatial Data Infrastructure is a set of technologies, measures, standards, services, human capacities and other factors that enable the effective aggregation, management, maintenance and sharing of spatial data.

This Law regulates the rules and obligations of SDI Subjects in terms of establishment, maintenance and development of Spatial Data Infrastructure in the Federation of BiH.
