

THE FGA WORK REPORT FOR 2020 ADOPTED AT THE FBIH GOVERNMENT SESSION

15.01.2021 13:29

A Work report of the Federal Administration for Geodetic and Real Property Affairs has been adopted on the 251th regular session of FBiH Government. Almost all planned activities has been realized during 2020 despite the situation caused by COVID-19 pandemic. The realization of the planned activities has been supported by budget, donor and credit funds.

The priority activity of the Federal Geodetic Administration in 2020 was harmonization of the cadastral and land registry data within the Real Estate Registration Project.

Planned activities on the High Precision Leveling Network project has been realized successfully and final goal is the Geoid calculation in cooperation with the Republic Authority for Geodetic and Real Property Affairs Republic of Srpska.

The activities on creating the topographic database continued during 2020, and completed for Zenica-Doboj Canton and Central Bosnia Canton.

Besides the activities on improvement of basic geodetic works, cartography and land consolidation, it was created draft of Rulebook on recording details.

It has been completed 37 cadastral municipalities for the public presentation of cadastral data, and the software application katastar.ba for public data display activities has been refined. The draft of Rulebook for maintenance the real estate cadastre was also prepared.

The maintaining activities of the software for cadastre, land registry software e-grunt, information systems and software licenses has been implemented according the adopted plan for 2020.

When it comes to cases of second-instance administrative proceedings during 2020. 1,064 cases were received and 1,236 cases were resolved, which is a significantly good result in relation to objective circumstances.

The results of projects; Real Estate Registration Project, Cilap, Public services for real estate market and European integration/ phase II and Spatial Region project are at enviable level, and the Real Estate Registration Project second phase implementation officially began on 17 December 2020.

At the end no less important information, the Government of FBiH made official the Spatial Data Infrastructure of FBiH web viewer at the Federal Geodetic Administration initiative, and the activities of the Spatial Data Infrastructure of FBiH will be one of the priority activities in current 2021.
