

Training on "Geospatial Knowledge Infrastructure" held in Rotterdam, Netherlands

16.05.2024 22:01

A three-day training program on "Geospatial Knowledge Infrastructure (GKI) for National Development" addressed key issues regarding the growth of geospatial knowledge, the impact of new technology ecosystems—including artificial intelligence, big data analysis, cloud computing, robotics, and drones—on user segments, and the role and relevance of the shift from data to knowledge in national development. Participants had the opportunity to learn about relevant practices and share experiences, all aimed at improving data management, promoting data sharing, interoperability, better decision-making, and adapting to new technologies.

Representatives from the Federal Administration for Geodetic and Real Property Affairs had the opportunity to attend the organized training in Rotterdam, Netherlands, from May 10 to 12, 2024. The training was attended by Ms. Jelena Zelić, Senior Advisor for NSDI and International Cooperation, and Mr. Jasmin Ćatić, Senior Associate for Geoportal NSDI FBiH. This engagement resulted in the awarding of appropriate certificates that confirm their active participation and contribution to the training.
