

# VISIT TO THE MUNICIPALITY OF STOLAC

01.04.2025 09:50

Director of the Federal Geodetic Administration, Mr. Željko Obradović, visited cadastral municipality Rotimlja and held a meeting with representatives of the Commission for public exhibition of survey data carried out in that area of the Municipality of Stolac.

Representatives of the Commission presented the results so far and informed the director that the entire process was proceeding according to the planned deadlines. Namely, the Federal Geodetic Administration, Cantonal Authority for Geodetic and Real Property Affairs and Municipality of Stolac, based on a joint agreement, are carrying out the public exhibition process of survey data in the area of Rotimlja and Trijebanj. After the completion of the cadastral part, which is planned for the current year, the establishment of the land registry for these cadastral municipalities, Rotimlja and Trijebanj, will follow.

The long-term plan is to successfully continue the establishing process of the cadastre and land registry for the remaining part of the Municipality of Stolac and the City of Stolac.
