

VISIT TO THE SERVICE FOR REAL PROPERTY AFFAIRS AND CADASTRE OF MUNICIPALITY NEUM

26.10.2018 17:49

Director of the Federal Administration for Geodetic and Real Property Affairs, Mr. Željko Obradović and employee of the Geoinformatics' Sector, Mr. Denis Tabučić have visited the Office for Real Property Affairs and Cadastre of Municipality Neum on 25 October 2018. Through the conversation with Mrs. Smilja Konjevod, Head of the Service and her associates, they were analysed activities which are implementing in this municipality.

The satisfaction with the Real Estate Registration Project realization was pointed out, and main project component- harmonization of cadastral and land registry data in City of Neum (cadastral municipality Neum1), and finalization of the Address Register.

A continuation for public display of data regarding survey and cadastral classification of land is now in preparation, and it will be the joint project of municipality service, Cantonal and Federal Administration for Geodetic and Real Property Affairs. The premises in which the municipal service is located are quite unethical for work, and it would be necessary to find a solution to improve the working conditions in the municipal office in Neum.
