

WORKSHOP WITHIN CILAP PROJECT 4 COMPONENT: „SUPPORT TO THE DEVELOPMENT OF GEODETIC INFRASTRUCTURE“

25.01.2018 11:06

In the organization of the CILAP project, a two-day workshop was held in Teslić from 23 to 24 January 2018 as part of the planned activities of the 4 Component: Support to the development of geodetic infrastructure.

The topic of the meeting was the drafting of the Rulebook on basic geodetic works, the plan of activities for auditing the project of the gravimetric survey of BiH, as well as other activities related to the leveling

survey of BiH and determination of the BiH geoid.

Representatives of the Federal Administration for Geodetic and Real Property Affairs presented the working version of the Rulebook on basic geodetic works, while the representatives of the Republic Administration for Geodetic and Real Property Affairs of the Republic of Srpska presented the amendments to the existing Rulebook. Further workshop guidelines have been agreed at the workshop with the aim of harmonizing both of these Regulations with international standards and recommendations, as well as with a joint Strategy adopted by both Administrations.
